

**NIT WARANGAL - DIAMOND JUBILEE (1959-2019)**  
**CELEBRATIONS**  
**INTERNATIONAL ALUMNI MEET AND**  
**NATIONAL CONFERENCE ON**  
**“TRANSFORMING NITW AS A WORLD CLASS**  
**TECHNICAL INSTITUTE – ROLE OF ALUMNI”**  
**10-12 October 2019**  
**(A Journey Towards Global Excellence)**

Spirits are soaring in the campus of the National Institute of Technology, Warangal (formerly REC Warangal) as it celebrates 60 years of its glorious existence. One of the premier institutes providing technical education and nurturing ‘crème de le crème’ of the youth; it has been known to produce leaders with an all-round personality.

The foundation of the institution was laid way back on the 10<sup>th</sup> October 1959 by the then Prime Minister of India Late Pandit Jawaharlal Nehru. It was first in the chain of 17 Regional Engineering Colleges that were started which promised to promote and impart technical education in a diverse and multi-cultural environment to the ‘youth of the nation’, and it certainly has lived up to the expectations over the years as is evident from the fact that it was, along with other RECs , elevated to the status of NIT (National Institute of Technology ) in the year 2002 by the MHRD, Government of India through an act of Parliament, emphasizing that these are the institutes of National importance.

And now, this illustrious institute is celebrating its Diamond Jubilee. Already into its 60<sup>th</sup> year, the institute’s campus has been bustling with activities over the past one year. The alumni of the institute have been visiting the campus, interacting with the students, making them aware of the latest in their respective professions, by means of organizing workshops and seminars.

The ‘great guns’ of the institute return to their ‘Alma Mater’ but this time all-together as the institute prepares to draw curtains on the Diamond Jubilee celebrations on a high note with the International Alumni Meet and National Conference on **“Transforming NITW as a World Class Technical Institute – Role of Alumni”**, during 10<sup>th</sup> to 12<sup>th</sup> October 2019.

Alumni will spend three days of networking and business sessions with loads of fun for them and their family members. Alumni will hear eminent alumni as they share their journeys of excellence. Alumni will hear their old teachers as they suggest how alumni can contribute towards making NITW a world class institute. Alumni can meet their old friends with families and regale themselves with stories from the "good old days". A unique opportunity to network, rekindle old friendships and learn from each other. Alumni would enhance knowledge by interacting more and willing to hear as all the alumni steer our alma mater to take center stage in the Diamond Jubilee year.

World class technical institutes revolve around excellence in research, academic freedom and an intellectually stimulating environment, internal self-governance by academics over key aspects of academic life and adequate facilities and funding. Nevertheless, higher education systems across the world have been going through significant restructuring processes to elevate their position and competitiveness within their own countries across the globe. Hence, making higher education and research ‘more visible and attractive to the world’ with a rewarding excellence have become the prime focus of the present day.

It is a well known fact that 'Technical Education' is one of the most significant components of human resources development spectrum playing a prominent role in improving the quality of life of the people. Evidently, technical education in our country has taken a quantum leap in the last decade in terms of quantity. However, the quality of several of these institutions leaves a lot to be achieved. In this scenario, the role of the NITs becomes crucial. It is also to be noted that technology has little significance if it is perceived in the absence of social concerns and connections; given the multi-cultural, multi-lingual and multi-ethnic nature of the country dominated by the masses. Alarmingly a majority of our population live in appalling conditions. Therefore, it should be the endeavor of every alumni and graduate of NITW to develop and utilize their technical knowledge and devise ways and means of improving the quality of life of our farmers, rural artisans, and the common man, in short. The Alumni of NITW have contributed immensely to the growth and development especially in the fields of public life, entrepreneurship, research, academics etc. Their contributions abroad in different fields of technology and public life are also laudable.

Alumni play a critical role in shaping and developing any institute. With this background, it is proposed to bring alumni from different professions like education, research, administration, public policy, industry and entrepreneurship onto a common platform to discuss on various issues related to "world-class" institution and strategy to transform NITW as one such institute. The discussions would revolve around various themes listed:

- ❖ Community service / Unnat Bharat Abhiyan
- ❖ Employability
- ❖ Engineering Research Trends
- ❖ Entrepreneurship / startups
- ❖ Industry 4.0 / Education 4.0
- ❖ Innovation
- ❖ Skill development
- ❖ Technical Education

Alumni are requested to share their experiences on any of the topic mentioned above. They are required to send their views limited to one page, which will be included in technical publication. Few articles will be permitted for oral presentation. In addition to these presentations, panel discussions will be held.

The grandeur of this mega event is evident as it coincides with the Diamond Jubilee celebrations and so, is bound to attract Alumni from across the world. More than 1000 alumni are expected to participate in the celebrations. It shall witness the revival of those nostalgic memories of the erstwhile days. The students of the institute shall get a chance to interact with some of the eminent personalities of the alumni, who have been contributing to the mankind through technological and social development in different parts of the world. They shall witness the leaders of today delivering visionary talks, excerpts from their personal lives, and sharing their profound knowledge about the engineering industry.

The event would witness the fusion of might and technological insight and shall certainly be a treat to the ears and eyes of one and all alike. All the alumni of NIT Warangal are requested to participate in these celebrations. For any details and clarifications, please contact,
