About the Course:
In the latest technology trend, organizations are looking for the intelligent automation tools to solve business challenges, increase productivity, efficiency, and accuracy which results in a benefit to the organization. The program is based on the assumption that we live in a world where the amount of data grows rapidly, but where the data also exposes more information. To keep up with this development, it is therefore necessary to equip ourselves with tools and techniques that dramatically speed up our interaction with increasingly complex data sources. The course will concentrate to learn about Data Intelligence, new AI/data science platform for managing complex data landscapes, building scalable, ML application Material Science, Geo Image Sensing and provisioning the entire data science process. The course is aimed mainly at data scientists, a fact of the matter is that big data will serve as a source of decision making and/or knowledge) and/or resources through the Internet, we call it “big data.”

Who should Attend?
The programme is open to Faculty members, Research scholars, PG students, UG students of all Engineering colleges and other allied disciplines in India.

Registration:
Registration fee is Rs.: 500/- for participant. Registration fee may be remitted Online through NEFT to the Bank account given below. Proof of remittance of the requisite registration fee (with transaction number if online transaction) shall be uploaded in the google form.

Course Coordinator from RERF-B
Mr. Surajit Dan, Assistant Professor
Regent Education and Research Foundation, Barrackpore
Ph. 9476231201, Email: surajitd@regent.ac.in

Resource Persons:
Eminent faculties from IITs, NITs, Central Universities, Experts from Industries and Senior faculty members from different departments of NIT Warangal will deliver talks and conduct hands on sessions.
