About NIT Warangal:
National Institute of Technology Warangal (NITW), formerly known as REC Warangal was established in 1959. Over the years, it has developed into a premier institute of higher learning. There are 14 Departments offering eight undergraduate and 34 postgraduate programs, besides doctoral programmes. It is a fully residential campus sprawling over 250 acres with excellent infrastructure in the form of state-of-the-art library, research equipment, seminar halls and smart classrooms, well-furnished laboratories. NIT Warangal is also very active in outreach and community services.

About the SCoPE Project:
In order to inculcate Scientific Temper, Spirit of Inquiry and Environmental Awareness among people through science communication in regional languages, the Vigyan Prasar, under DST, has started, as one among many of its variety of programmes, a mission project, Science Communication Popularization and Extension (SCoPE). The National Institute of Technology Warangal (NIT Warangal) has been chosen to monitor and coordinate SCoPE Project with Prof. K. Laxma Reddy, Professor (HAG) of Chemistry as its Principal Investigator and Prof. A. Ramachandraiah, Professor (HAG) of Chemistry (Retd) as its Coordinator. The SCoPE Project has so far, from August, 2021, conducted about 40 Webinars in Telugu on a variety of S&T Topics by eminent scholars and has been running an online science monthly, Vijnana Vani besides holding Workshops and publication of books on popular science topics. National Workshops on Engineers’ Day on 15th Sept., 2022 and National Mathematics Day on 20th December, 2022 have been also organized.

About the Science Week Festival:
The country is grandiosely celebrating its 75th year of Independence with the slogan, Azadi Ka Amrit Mahotsav from last 15th August till next. The realms of Indian Science and Technology over the last 75 years have had a splendid impact on few decades.
